

# uk vs. china: why invest in a "made in the uk" machine?

quality, reliability, warranty, safety...

[MORE RESOURCES ON OUR WEBSITE](#)

# quality: the cheaper option turns out more expensive

 at uk lottery machines we use quality materials to build our products. we work with uk-based engineers and designers to create the most efficient and durable design in the market.

 chinese machines are built with cheap materials to ensure low prices.

# reliable shipping: free to mainland england

 our machines are built in the uk. therefore, we can deliver it to your home or business in a very short period of time, and with no extra charge to mainland england.

(check our delivery options for more information)

 chinese machines take between 1-3 months to arrive from china, and are usually attached to high shipping/customs charges.

# personalised customer service: 100% based in the uk

our sales and customer care team are available 24/7 via email . we will help and assist you from the beginning until the end to make sure your machine is up and running in no time!

are you fluent in chinese?

# 12-month warranty and 30-day free return

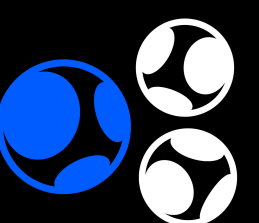

if you are not happy, neither are we.

(check our "warranty terms and conditions" page on our website for more information).

most chinese lottery machines do not include a warranty period or the possibility of return.

# showroom available: see in store, buy online

 not sure about purchasing without checking the product in person? not a problem. come by our showroom. contact us to get an appointment.

 the average price of a plane ticket uk-china is £500.

# safety measures: following european regulations

 all our products follow current european regulations regarding safety standards and labelling.

 chinese lottery machines often fail safety tests.
